Gentlemen:

The blue plate of the war decorations at hand. As far as we can tell from this plate the photographs are all right. If possible, we would like to have you modify a little the high lights on the white cross, as we have indicated. We want this to show a rounded surface but not enough to be too conspicuous. We have indicated by pencil about where we would like to have the ribbons cut off at the side. We would like to have them extend equally from each side of the decoration and we would like them trimmed square in three instances.

Very truly yours,

HW:JG

Curator
